

PENNZOIL MARINE[®] FUEL SYSTEM CLEANER & STABILIZER

PRODUCT DESCRIPTION

PENNZOIL MARINE[®] FUEL SYSTEM CLEANER & STABILIZER is designed to prevent gum and varnish build up, rust and corrosion in fuel systems of outboard engines and gasoline or diesel powered inboard engines.

PENNZOIL MARINE[®] FUEL SYSTEM CLEANER & STABILIZER will keep stored gasoline and diesel fuel fresh, eliminating the need to drain the fuel at the end of the season, and providing easier starting after storage. It works equally well in both two-cycle and four-cycle, gasoline and diesel engines.

APPLICATION

PENNZOIL MARINE[®] FUEL SYSTEM CLEANER & STABILIZER treats up to 12 gallons of fuel. For smaller tanks, add one ounce per one gallon of fuel. After adding the treatment, idle the engine for at least 10 minutes to circulate the treated fuel through the entire fuel system.

PENNZOIL MARINE[®] FUEL SYSTEM CLEANER & STABILIZER can also be used in gasoline or diesel powered equipment and vehicles that are used infrequently or on a seasonal basis such as:

Automobiles	Motorcycles
Boats	Outboards
Chain Saws	Portable Generators
Farm Equipment	Recreational Vehicles
Garden Equipment	Riding Mowers
Garden Tractors	Snow Mobiles
Golf Carts	Snow Throwers
Lawn Edgers	Stationary Engines
Lawn Mowers	String Trimmers

PENNZOIL MARINE[®] FUEL SYSTEM CLEANER & STABILIZER WILL NOT HARM CATALYTIC CONVERTERS, EMISSION CONTROL DEVICES, OR OTHER ENGINE COMPONENTS.

TYPICAL PHYSICAL AND CHEMICAL PROPERTIES

TEST	METHOD	TYPICAL RESULTS
Viscosity @ 40°C, cSt	ASTM D-445	3.0
Specific Gravity @ 68°F	ASTM D-287	.82
Flash Point, °F (PMCC)	ASTM D-93	143
Pour Point, °F	ASTM D-97	-50
Appearance		Light Amber Liquid
Non Volatile % wt. (1 hr .@ 110 C)		3.0
NFPA Classification		Class 3.a. Combustible Liquid
Material Number 12/12 Ounce		1110
